SKUS:
MCD101-103

What is a THC "Microdose?" Our THC Microdoses, at 2.5mg THC per serving, are a great way to enhance your creativity, mood, and rest without having a full THC dose psychedelic experience. Our microdose oils provide precision and control of your THC experience. Experience all the groove without any of the sugar found in edibles, and let our organic flavors – Passionfruit, Strawberry, and Vanilla – guide you towards the feeling that you desire.

LIVE RESIN Live Resin is made with cannabis that's frozen immediately after harvesting, which preserves the unique expression of terpenes in each strain. This delivers unmatched effects for cannabis connoisseurs and new users alike.

Organic MCT Oil MCT oil, derived from coconuts, is known for its rapid absorption and potential health benefits; research suggests MCT oil may improve cognitive function and support heart health.
