## REISHI

reduce stress, promote relaxation, support immune function, improve sleep quality, anti-inflammatory and antioxidant benefits

**RASPBERRY MELON**

**1:1 Ratio of THC:CBG, THC:CBD, & THC:CBN** Our THC+Mushroom Gummies come in Sativa, Hybrid, and Indica, and intentionally utilize CBG, CBD, and CBN, respectively, along with the most compatible medicinal mushroom extracts to create connoisseur craft gummies that satisfy on every level.

**Mushroom Fruiting Body Extracts** All of our mushroom extracts are exclusively crafted from fruiting bodies, which are the most nutrient-packed part of the mushroom. This method provides superior efficacy compared to other extracts and ensures maximum beneficial compounds in every gummy.

**L-theanine** Unlock a new level of tranquility as L-theanine, sourced from tea leaves, enhances the calming effects of cannabis and promotes a sense of calm, clarity, and well-being. L-theanine also increases alpha brain waves and boosts GABA, serotonin, and dopamine production.
